Nationality: Lithuanian
Address: District Tan Binh, Ho Chi Minh City, Vietnam

Profile

I started exploring the computer science field to satisfy my curiosity and wish to deal with issues on my own. As a matter of fact, I derive pleasure from having the ability to fix and create things independently whenever I am facing a challenge while working on a computer. This feeling fuels my ongoing journey in learning.

Experience

Portfolio Website
A responsive portfolio webiste created using **HTML**, **CSS** and **Javascript**.

Todo List
A simple application to create, show and delete todo list items. It is written in **Django** framework and styled with **Bootstrap**.

Cooking Recipe
A recipe search website built using Edamam **API**, **Python**, **Django** framework and **Bootstrap**. A user can look for a recipe by typing an ingredient or dish. With a click on a chosen recipe a user will be redirected to a full description.

Photo Sharer
A **Python Django** application that allows users to register, create a profile and share their pictures. They can update and delete their posts. The app handles user authentication. To increase better user experience, Crispy forms were added.
